

**Audi** BKK

# Strong services.

Overview of benefits.

**Listening** is our strongest skill.

# Sustainably healthy.

Healthy people need a healthy planet. That is why we as a health insurer feel particularly committed to protecting our environment. We want our world to keep being a healthy habitat for all of us, including in the long term.

For this reason, we put together a sustainability concept in 2020. We utilise the resources available to us responsibly and reduce our carbon emissions with determination. Our procurement is aligned with sustainability and integrates social and environmental criteria. We get involved with many prevention projects in schools and kindergartens so

that even the youngest among us gain awareness of a climate-friendly lifestyle.

Moreover, we work with many other partners to promote a sustainable and future-proof healthcare system, achieving more together.

Find out here what else we do for sustainability:  
[www.audibkk.de/nachhaltigkeit](http://www.audibkk.de/nachhaltigkeit)

# Benefits at a glance.

Your health is our mission. With more than 830 employees at 28 locations, we are there for you and your loved ones. More than 780,000 policyholders throughout Germany now place their trust in us. Regular awards and quality seals show that we give our members what they need to lead healthy lives. For example, Audi BKK has the most satisfied customers, according to Kundenmonitor 2024.

Here is a brief summary of the benefits offered by Audi BKK:

- + GesundheitExtra with up to €200 in health benefits**  
Our allowance for important treatments such as osteopathy and professional teeth cleaning.

---

- + Prevention package for the whole family**  
The package offers great extras such as special preventative check-ups for children through BKK Starke Kids (BKK Strong Kids) as well as digital midwife consultations, video consultations and app-based language training.

---

- + Digital bonus programme – quick and easy**  
Whether a check-up, gym membership or a children's medical examination, we reward your preventative care activities with a bonus of up to €120.

---

- + Travel vaccinations**  
We cover the full cost of all recommended travel vaccinations, including medical treatment.

---

- + Service app – smart and connected**  
Fast, straightforward and no paperwork! Save time easily with the wide range of functions in our service app.

---

- + Health courses: allowance of up to €200**  
Back training, Pilates or relaxation classes: we will cover 100% of the costs if the course fee for a maximum of two health courses is no higher than €100 each.

---

- + Health week: allowance of €200**  
Indulge in a personal break for yourself with functional training, yoga, fascia training and much more.

---

- + Selectable tariff bonus payment – get your money back**  
We reward you for being cost-aware.

---

- + Attractive rate**  
In 2025, our additional contribution rate of 2.4% will once again be lower than the average additional contribution rate offered by all health insurers.

---

- + Open to all**  
As an open company health insurance fund, we are open to anyone who wishes to choose us.

Become a member now:

# Profit in many ways.

With the fantastic Audi BKK offering, you contribute to your health and get big rewards for your bank account, too.

## GesundheitExtra

With GesundheitExtra, we refund you **up to 200 euros** per calendar year for selected services. Osteopathy, folic acid supplements for pregnant women or professional teeth cleaning – these are important treatments that we are happy to subsidise. The programme is available to you from 1 January of each calendar year, but no earlier than the insurance start date.

[www.audibkk.de/gesundheitsextra](http://www.audibkk.de/gesundheitsextra)

Example

Osteopathy	€90
Professional teeth cleaning	€30
On-call midwife	€60
Homeopathic remedies	€20
<b>Costs reimbursed by Audi BKK</b>	<b>€200</b>

## Travel vaccination

Travel safely and save money, too – with our travel protection. **We cover the full cost of all recommended travel vaccinations, including medical treatment.** We also offer free medical travel advice. This way, you can be sure you are aware of all vaccinations needed for your destination. You can find more information about possible travel vaccinations at: [www.audibkk.de/reiseschutz](http://www.audibkk.de/reiseschutz)

**Sample calculation for a trip abroad to Egypt (based on vaccine recommendations)**

Vaccinations/services	
Cholera	€97
Hepatitis A/B (adults)	€137
Meningococcal C/ACWY	€55
Polio	€27
Rabies	€80
Typhoid	€36
Doctor's fee (max. 2.3 factor under fee schedule)	€32
<b>Costs reimbursed by Audi BKK</b>	<b>€464</b>

## AktivFit – the digital bonus programme in the Audi BKK service app

When you get your preventative care activities such as gym membership, preventative dental care or check-ups confirmed in your bonus booklet, you get **up to 120 euros** back each year. Additionally, your children aged 14 or under can also participate in their own AktivFit bonus programme – and earn **up to 80 euros**.

**People insured with Audi BKK receive 10 euros for each of these activities:**

- > child check-ups
- > preventative dental care
- > preventative check-ups
- > check-ups
- > vaccinations
- > sports club membership
- > gym/yoga studio membership
- > for each preventative course (including online) or health week participation
- > tests or examinations during pregnancy
- > screening tests, e.g. for newborns

You can find further details at:

[www.audibkk.de/bonusprogramm](http://www.audibkk.de/bonusprogramm)

Download the service app now and start collecting!

Confirm your bonus activities in the service app in full convenience – fast, straightforward and requires no paperwork. [www.audibkk.de/serviceapp](http://www.audibkk.de/serviceapp)

# Look after yourself.

Health is a gift. Maintaining it over the long term, though, requires some action. Sometimes, that isn't so easy in day-to-day life. That is why we are happy to help you with it – with our offering to keep you healthy.

## Health week

When everyday life demands a lot of you and often keeps you busy, some targeted time off can help you. It assists you in recharging depleted energy reserves and drawing new strength. The Audi BKK health week with back training, spinal and water gymnastics, functional training, yoga and mindfulness exercises help you catch your breath and make a lasting improvement to your well-being. When certain requirements are met, you can participate once per year and we will make a 200 euro contribution to your health week. You can find more information at: [www.audibkk.de/gesundheitswoche](http://www.audibkk.de/gesundheitswoche)

**By the way**, you can alternatively attend up to two health courses nearby you.

## Sports medical

Sports provide valuable balance for the body and mind in the everyday hubbub. Whether starting new or returning to an old pursuit, those who haven't started training shouldn't jump right in. See a doctor beforehand for a sports medicine examination. This lets you adapt your sporting activities to your individual fitness level. We support your sports medical with 60 euros for each of two service modules: medical history and clinical examination as well as diagnostic examination and lactate testing. This means you can get a maximum of 120 euros (service modules I and II combined). [www.audibkk.de/sportcheck](http://www.audibkk.de/sportcheck)

## Health courses

Regularly taking time out and looking after your well-being can be hard. A health course often makes it easier to actually achieve this wish. That is why we offer you numerous, quality-assured courses and offerings for exercise, relaxation, nutrition and addiction prevention at sports clubs, adult education centres and gyms. When you attend regularly (at least 80 per cent of sessions), we reimburse you 100 per cent of the course fees (maximum 100 euros per course) for up to two certified courses per calendar year. You receive the same subsidy for our online courses, too. [www.audibkk.de/kurse](http://www.audibkk.de/kurse)

### Online exercise course, including personal coach

Keep fit and active with an exercise course with our partner MotivAktiv, which you can do anywhere via your smartphone, tablet or PC. Choose from our interactive online prevention courses to strengthen your back, shoulders and arms or hips and legs. Take advantage of:

- > an initial health analysis and advice on the right course for you;
- > regular training;
- > personalised support before, during and after the course;
- > simple registration via the Audi BKK Online Center.

More information: [www.audibkk.de/motivaktiv](http://www.audibkk.de/motivaktiv)

### Online stress management course

Stay healthy even during periods of stress. HelloBetter is here to help – 'Fit in Stress' is a scientifically tested psychological online training course with motivating support. It offers eight training sessions to help you to reduce stress yourself:

- > supervision by trained psychologists;
- > flexible participation via PC or laptop;
- > development of coping strategies and resilience.

More information: [www.audibkk.de/hellobetter](http://www.audibkk.de/hellobetter)

Online course participation is free of charge for Audi BKK customers. You can find more information about registration at: [www.audibkk.de/kurse](http://www.audibkk.de/kurse)

## Skin cancer check-up

The skin is our largest organ and reacts sensitively to environmental influences. It is therefore important to have your skin checked regularly. The earlier that skin cancer is detected, for example, the greater the chances of recovery are. You should have your skin checked at a dermatologist every two years. In accordance with statutory provisions, health insurers pick up the bill for this examination for those 35 or older. We go one step further and let those insured with us get a skin cancer check even when they are between 15 and 34 years of age, once every two years at participating dermatologists. For further information, simply ask your service centre. [www.audibkk.de/krebsvorsorge](http://www.audibkk.de/krebsvorsorge)

## Health advice around the clock

Many things need to be done fast these days. Often, there is little time left for your health-related questions. Not with us, though, because we listen to you. **Simply call our medical hotline: using the free-of-charge number 0800 2834 255, you can reach us around the clock. Including by video call.**

Our team of expert doctors and specialist medical practitioners gives you the time you need. You can discuss topics such as:

- > illnesses, preventative healthcare and nutrition, including medicines and alternative forms of treatment;
- > inpatient treatment and preparation for consultations with doctors;
- > help looking for a doctor or selecting a hospital;
- > Covid-19-related questions regarding vaccination, tests and similar.

You can trust in our discretion, doctor-patient confidentiality and data protection.

You can find further information at: [www.audibkk.de/medizinische-hotline](http://www.audibkk.de/medizinische-hotline)

# For the family.

## Fertility

Audi BKK helps you achieve your desire to have a child. If pregnancy is not achieved even after advice and treatment, married couples can seek support at fertility clinics. If you decide on IVF, Audi BKK generally offers a standard benefit of 50 per cent of the costs. More on this at:

[www.audibkk.de/kuenstlichebefruchtung](http://www.audibkk.de/kuenstlichebefruchtung)

In addition, for IVF at participating reproductive medicine clinics, we offer subsidies going beyond the standard benefit:

- > cost sharing for two cryocycles
- > cost sharing for two blastocyst cultures
- > cost sharing for a fourth attempted treatment
- > fertility support for women up to 42 years of age

This offering is available nationally. You can find more information at: [www.audibkk.de/kinderwunsch](http://www.audibkk.de/kinderwunsch)

## BabyCare

How much sleep do I need? Which food items are really good for me and which ones are an absolute no-go? With the BabyCare programme, we ensure that you get answers and can enjoy your pregnancy with as much health and as little worry as possible. Not only do you learn everything you need to know about pregnancy risks, but you also benefit from an analysis of your personal habits such as your nutrition. Together, we reduce possible risks in good time and, ideally, avoid them altogether. You can request your BabyCare package with a detailed handbook at a service centre near you or order one online conveniently:

[www.audibkk.de/kontakt](http://www.audibkk.de/kontakt)

Or, just use the BabyCare app. It lets you access your data and information whenever, wherever and also benefit from many other tests. For instance, you can review your medicines, vitamins and minerals at any time. What's more, documentation functions and checklists are provided for you. The app also has other features such as an e-book version of the BabyCare handbook, exercises with video instructions, relaxation music for mum and the baby, healthy recipes for pregnant women, a blog with exciting articles and an 'After Birth' section. You can find further information about BabyCare at: [www.audibkk.de/babycare](http://www.audibkk.de/babycare)

## Hallo Baby

Premature birth is one of the special challenges of pregnancy. Risk factors that can lead to premature delivery include, for example, bacterial vaginosis and toxoplasmosis infection, which are symptomless infections. We support you and your child with Hallo Baby so that your baby can develop peacefully and without interruption. Under the programme, we pay for the costs of check-ups for early detection of symptomless infections and go beyond the legal minimum. Learn more about this at: [www.audibkk.de/hallobaby](http://www.audibkk.de/hallobaby)

## keleya midwife consultation, including online courses

We support you with keleya, our free, digital midwife consultation service. Whether by chat or phone, you can always get in touch with a midwife whenever you need.

Online, video-based courses for delivery preparation and post-partum recovery are available around the clock during the time of your participation and supplement the consultation service.

All keleya midwives have government-recognised qualifications and professional experience. Furthermore, an advisory board of doctors and psychologists is there to reinforce the team. keleya does not, and is not intended to, replace in-person contact with an obstetrician, midwife or doctor team. However, the digital consultation can be an effortless complement to already existing care. Register at [www.keleya.de](http://www.keleya.de) with your Audi BKK insurance details or download the keleya app.

**Tip:** on our website, you can also use a midwife search function to find contracted midwives providing in-person care. Simply follow this link: [www.audibkk.de/hebammenhilfe](http://www.audibkk.de/hebammenhilfe)

## The special extra for you

It is important to you and to us that you are cared for comprehensively during your pregnancy. So, use GesundheitExtra – our offering with which you can apply for partial reimbursement for other services.

These include for example:

- > folic acid supplements for pregnant women
- > on-call midwife
- > payment of course fees for your partner when attending antenatal classes

Find more about GesundheitExtra at: [www.audibkk.de/gesundheitsextra](http://www.audibkk.de/gesundheitsextra)

## Audi BKK service

You can find further information for expecting parents in our brochure called 'Becoming Parents – Everything You Need to Know!', available on our website at [www.audibkk.de/schwangerschaft](http://www.audibkk.de/schwangerschaft) and at Audi BKK service centres. Order the brochure online easily and free of charge at: [www.audibkk.de/kontakt](http://www.audibkk.de/kontakt)

## Connecting paediatric practices with telemedicine – PädExpert®

Specialised paediatricians can frequently only be found in medical hubs and major cities. Visiting them often comes with significant wait and travel times. We save you time by offering you and your child the PädExpert® expert telemedicine network if your child has a chronic or rare illness.

With this innovative, national system providing consulting physicians, your outpatient family doctor can seek expertise on various symptoms from specialised practices. The treatment continues in the family practice that you know and trust, and you no longer need to embark on a long journey to a specialised practice. An initial assessment is usually done within a day, and a final diagnosis is made after eight days on average.

In addition to the expert network, there are also possibilities for app-based long-term monitoring and video consultations with the treating physician. Using your smartphone, the young patient's health data can be kept in a long-term journal and analysed. With the app, family doctors can track the treatment progress and initiate any further steps that might be necessary. These offerings provide targeted support for outpatient, close-to-home paediatric care for specific illnesses such as rheumatism, asthma, headache, stomach pain and crying. You can find further information at: [www.audibkk.de/starkekids](http://www.audibkk.de/starkekids)

## Identify needs early – Starke Kids by BKK

Your child develops and explores the world step by step. If, for some reason, something does not go right in its development, we help you out. Things that are detected earlier can be treated more successfully. In the areas of speech, motor skills and sight in particular, up to one-third of all children in Germany require special support. The Starke Kids by BKK programme acts as a type of early-warning system. With it, we offer you specialised examinations and test methods which make it possible to detect potential abnormalities at an early stage. We listen and look closely. Another valuable component is the improvement of communication between teachers, the doctor's practice and parents. Close communication between all of them is highly important for the sensitive observation of your child.

[www.audibkk.de/starkekids](http://www.audibkk.de/starkekids)

## Your child in hospital – and mum or dad stay, too

If your child needs to go to hospital, it can be helpful for their recovery when mum or dad stays the night, too. The doctor decides if a companion is medically necessary for your child. If that is the case, you will not be charged any costs to stay in the hospital as a companion. Working parents (insured with an entitlement to sick pay) also have an entitlement to children's sick pay when they are admitted to hospital with their sick child on an inpatient basis. The entitlement to children's sick pay exists for as long as the parent stays with the child. There is no cap on the entitlement, and the time is not deducted from the children's sick days you are allowed by law. However, the entitlement only exists if it is medically necessary for the parent to stay with the child and if the child is younger than 12, or disabled and requires help. More information about this at:

[www.audibkk.de/roomingin](http://www.audibkk.de/roomingin)

## Domestic help in emergencies

Do you have strong pregnancy issues or have just delivered, leaving you weakened and unable to run your household? We support you with domestic help if there is nobody living in your household who can take over these duties.

Details at: [www.audibkk.de/haushaltshilfe](http://www.audibkk.de/haushaltshilfe)

## Free family insurance

We welcome every member of the family. This means every infant enjoys comprehensive insurance coverage from Audi BKK from birth – without any additional contributions. A brief call to our service centre will suffice. We will then send you a questionnaire which you must complete and return with a copy of the birth certificate.

## Girls' consultation

Gynaecologists are important resources for girls and young women in a sensitive phase of their lives. To make the first interaction a positive experience, a 'girls' consultation' is now on offer – a consultation specifically for 12- to 17-year-old girls and young women. It offers the possibility of initial, easy-to-access contact and a safe space for a personal advisory conversation and trusting dialogue. Learn more about this at: [www.audibkk.de/mädchensprechstunde](http://www.audibkk.de/mädchensprechstunde)

# Get healthy.

There are times when things do not go as planned. Being sick forces us to slow down. To get back on your feet quickly, we maintain offerings that support your broad-based recovery.

## Fast doctor's appointments – appointment service for nationwide care

You should be given the best care possible, and around the clock, too. Our appointment service arranges appointments at GPs, family doctors and specialists within one week and at a reasonable distance, all across the country. The appointment service arranges appointments for acute psychological treatment within two weeks. It also arranges appointments for an initial psychological consultation and therapy sessions.

### On-call medical service

The on-call medical service is available for you when your doctor's practice is closed. This emergency service can be accessed out of hours from Monday to Friday as well as at night, at the weekend and on public holidays in all of Germany.

**For all health-related matters, you can use the 116117 app, or make an appointment online or by phone at the number 116 117 (free call).**

## Doctor fee comparison

How expensive are dentures? Or other co-pay services? These are questions that leave many people stumped. But that's why you have us: our partner portal, [www.medikompass.de](http://www.medikompass.de), offers you a real value-for-money check and, for example, can find a dental practice for you that is nearby and offers excellent value for money. For dentures, for example, you can save up to 30 per cent on average. If you prefer to have private treatment, that is not a problem. The portal will find up to five cost-effective providers for you.

## Online skin check

From inflamed insect bites to allergic reactions and sunburn, you do not want to wait long for an appointment when you have an acute skin problem. For this reason, we offer you a fast and flexible online skin check, giving you a specialist assessment and treatment recommendation within no more than 48 hours, regardless of the place or time. More on this at: [www.audibkk.de/onlinehautcheck](http://www.audibkk.de/onlinehautcheck)

## TeleClinic

It might be a familiar feeling: being at home, lacking strength and unable to face the trip to the doctor. Is it always absolutely necessary to see a doctor in person?

When you are insured with us, we offer you a logical alternative to a doctor's appointment. With our partner TeleClinic, your consultation with the doctor takes place conveniently and without any long wait time by video chat in an app. Another plus for you is that you can keep track of all the treatment documents in the digital application at all times. We pay the costs of the online doctor for you.

You can find more information here:

[www.audibkk.de/teleclinic](http://www.audibkk.de/teleclinic)

## Homeopathy

A growing number of people are trusting in the gentle power of natural remedies as an alternative form of treatment. Homeopathy, for instance, which is based on the body's own self-healing powers, is increasingly valued as a supplement to conventional medicine or as a discipline of its own. We offer you this natural treatment method with specially qualified doctors who have obtained a diploma from the German Central Association of Homeopathic Doctors (DZVhÄ). This care includes an initial medical history, a follow-up medical history, homeopathic analyses and the selection of homeopathic remedies. You also have the option of seeking reimbursement for further costs through GesundheitExtra. You can find a list of participating doctors at: [www.audibkk.de/leistungen-services/leistungen-a-z/homoeopathie](http://www.audibkk.de/leistungen-services/leistungen-a-z/homoeopathie)

## medicalmotion app

Migraine, tinnitus, back pain: if you want to do something actively to manage your pain alongside your specialist treatment, you can do physical training using the digital therapy app from our partner medicalmotion. More information at: [www.audibkk.de/medicalmotion](http://www.audibkk.de/medicalmotion)

## Domestic help

We are there for you if you need help. That is why we enable domestic help for you when you need it: from the first day of demonstrated medical necessity. In certain cases, we can offer domestic help even when you do not have a child younger than 14 living in your household. [www.audibkk.de/haushaltshilfe](http://www.audibkk.de/haushaltshilfe)

## Supplementary insurance

There are times in life when you might want to supplement your already extensive insurance cover. Based entirely on your personal needs, we offer suitable supplementary insurance via our partners so that you can enjoy the feeling of all-round security.

- > supplementary dental insurance with up to 100% reimbursement
- > travel medical insurance
- > supplementary outpatient insurance/natural remedies
- > supplementary inpatient insurance
- > short-term income protection insurance
- > private supplementary long-term care insurance

Find out more at: [www.audibkk.de/zusatzversicherungen](http://www.audibkk.de/zusatzversicherungen)

## Colon cancer screening

Those insured with Audi BKK have the option of testing their colon cancer risk once per year with a quick and easy home test kit, starting at 35 years of age.

Further information at: [www.audibkk.de/darmkrebsvorsorge](http://www.audibkk.de/darmkrebsvorsorge)

## Apps for new, digital forms of care

The healthcare sector is continuing its digital transformation. Accordingly, we offer you special, digital medical products for a variety of symptoms. These digital healthcare applications are intended to identify illnesses, alleviate them, monitor them and help with treatment. They include smartphone apps and browser-based applications, among other things. You can use digital healthcare applications by yourself or in conjunction with your doctor. In the list of digital healthcare applications published by the Federal Institute for Drugs and Medical Devices (BfArM), you can find all digital healthcare applications that have been approved by the institute and for which Audi BKK can offer reimbursement. The digital healthcare applications in this list can therefore be prescribed by a doctor or therapist or approved by us directly if indicated accordingly.

### The list provides the following information and contents:

- > attributes and services of the digital healthcare applications
- > illnesses for which use of the digital healthcare applications is appropriate and contraindications for which use is not recommended
- > the way the digital healthcare applications can be prescribed in doctor's or therapist's practices and activated on your device
- > the positive effects on care that have already been or still need to be demonstrated by the digital healthcare applications
- > the recommended length of use of the digital healthcare applications

Further information and the official digital healthcare application list can be found at: [www.audibkk.de/diga](http://www.audibkk.de/diga)

# Intelligently connected – overview of digital offering.

The benefits and services we provide are intended primarily to promote your health. They should integrate into your life easily so that you can use them without complications. For this reason, we are constantly expanding our digital solutions. They are available at the click of a button.

## Look after yourself

- > online courses for exercise, nutrition and stress management
- > medical hotline, including video consultation
- > online presentations on many different health-related topics

## For the family

- > BabyCare app for worry-free pregnancy
- > digital midwife advice, including online courses
- > online treatment for poor vision in children
- > telemedicine – PädExpert®
- > neolexon – speech therapy app for children
- > online psychotherapy for children and adolescents

## Get healthy

- > doctor fee comparison
- > second opinion on cancer and orthopaedics
- > doctor and clinic finder
- > online psychotherapy for adults
- > digital healthcare applications
- > nursing care finder
- > TeleClinic

## Online magazine

Get the latest information straight from the source with our environmentally friendly online magazine at [www.audibkk.de/gesundheit](http://www.audibkk.de/gesundheit), which gives you digital features and current news, trends and background information on the subjects of health, fitness and lifestyle each month. Simply sign up at: [www.audibkk.de/ich-lese-online](http://www.audibkk.de/ich-lese-online)

## Online Center

We are there for you any time, any place with our Online Center. Around the clock, seven days a week. In your personal section, you can do things such as view and edit your personal details, submit applications digitally, download a membership certificate, activate your online inbox and much more. We are continually adding further functions and digital applications to complement the services. More information: [www.audibkk.de/online-center](http://www.audibkk.de/online-center)

## Electronic patient file for everyone

Audi BKK provides an electronic patient file for all people it insures. Anyone not wanting their electronic patient file can easily have it deleted via our ombudsman, with an email to [ePA.ombudsstelle@audibkk.de](mailto:ePA.ombudsstelle@audibkk.de).

The electronic patient file supports the exchange and use of healthcare data between all treatment providers so that targeted improvements can be made to patient care. It lets you and your doctors keep track of your treatment history. Moreover, you decide who gets to see your data and for how long.

Medication lists, doctor reports and operation reports have been accessible in the electronic patient file from the beginning. Later, the digital medication process will be added (starting summer 2025) as well as laboratory results (starting early 2026). All information at: [www.audibkk.de/epa](http://www.audibkk.de/epa)

## Service app

Take advantage of the value added by our app:

- > change personal details and address, change bank account
- > overview of all enquiries and applications you submit via the app or online centre
- > personal matters via contact form
- > use bonus programme digitally
- > manage family member data
- > activate digital inbox and receive letters and messages
- > healthcare data: everything at a glance
- > medication overview – safe consumption and reminder function
- > check-up reminders to ensure you never miss an appointment again
- > recommended vaccinations – always the latest information
- > view electronic doctor's certificate

As an Audi BKK member, the app is available for use by you and family members who are aged 15 and over and have family insurance cover.

### Your data is secure

The app secures your data using two-factor authentication. Your data can only be modified using the device registered by you and only after entering a PIN. You can find detailed information about the service app here: [www.audibkk.de/serviceapp](http://www.audibkk.de/serviceapp)

## Become a member now

We mean it when we say, 'Listening is our strongest skill.' That is how you can expect benefits and services from us that make your life easier, save time and support your health comprehensively.

### Your benefits at Audi BKK

- Personal advice
